EDUCATION

B.Tech, Computer Science and Engineering

2027

M S Ramaiah University of Applied Sciences

CGPA: 9.83

Relevant Coursework: Data Structures & Algorithms, Operating Systems, Database Management Systems, Computer Networks, Object-Oriented Programming, Software Engineering

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript, SQL, x86 Assembly

Frontend: React, HTML, CSS, Bootstrap, Material UI

Backend: Node.js, Express.js

Databases: MongoDB, SQL

ML/Data Science: Pandas, Scikit-learn, Matplotlib, Seaborn

Tools: Git, Postman, Figma

Core CS: Data Structures & Algorithms, REST APIs, OOP, DBMS, UI/UX Principles

PROFESSIONAL EXPERIENCE

Prodoc AI — MERN Stack Developer Intern

Jul 2025 – Sep 2025

Bengaluru, KA

- Improved UI consistency across the product by resolving design and layout issues.
- Developed a full-stack demo request workflow using React, Node.js, Express.js, and MongoDB, integrating email confirmations and admin approval.
- Designed MongoDB schemas powering analytics dashboards and operational workflows.
- Built analytics dashboards with 8+ interactive charts for partner revenue, KPI tracking, and performance comparisons.
- Engineered scheduled backend jobs to send personalized WhatsApp birthday messages to partner doctors.
- Implemented automated WhatsApp notifications for field agents on missed hospital visits.
- Streamlined client reporting by generating formatted Excel reports and delivering them automatically via email.

Processware Systems — Web Development Intern

Aug 2024

Bengaluru, KA

[Live Demo](#)

- Built front-end prototype for Aadhaar-based authentication system.
- Implemented Aadhaar and OTP validation logic with responsive UI.

13to19 — Head Researcher & Writer

Aug 2021 – Apr 2023

Bengaluru, KA

[View Post](#)

- Directed research and content development for teen-focused educational posts.

PROJECTS

Mobile Price Range Classification — Machine Learning Project

Tech Stack: Python, Pandas, Scikit-learn, Matplotlib, Seaborn

[GitHub Repo](#)

- Performed EDA and preprocessing on a Kaggle dataset containing 2,000 mobile devices and 21 features.
- Engineered features such as total camera quality, battery-to-core ratio, and memory ratio to improve predictive performance.
- Trained and evaluated Logistic Regression and Random Forest classifiers using Scikit-learn.
- Improved model accuracy from 80.5% to 92.25% through feature engineering and model optimization.
- Evaluated models using confusion matrix, precision, recall and F1-score.

Rescue Pals — Full Stack MERN Pet Adoption Platform

Tech Stack: React, Node.js, Express.js, MongoDB, JWT, Material UI, Axios, Multer, Zod

[Live Demo](#)

- Developed a full-stack MERN pet adoption platform following SDLC practices.
- Implemented JWT authentication, RBAC, protected routes, and adoption workflows.
- Designed RESTful APIs and MongoDB schemas for core platform features.
- Built an admin dashboard with CRUD operations, file uploads, and real-time user interactions.
- Applied Zod validation to ensure data integrity across the application.

ACHIEVEMENTS

- Ranked 3rd in a technical competition involving frontend development, DSA, and technical interviews.
- Advanced to Round 2 of 3 in Tech Tonic, a DSA-focused programming contest.
- HackerRank - Java (Silver Badge)
- Solved 35+ coding problems on LeetCode and HackerRank covering DSA and SQL.
